This four door SUV was long sought after from customers wanting classic Jeep design in a newer sporty SUV. The Jeep Commander Repair Manual helps auto body shops and owner alike make any necessary repairs. Let us help guide you through your work and help restore the Jeep Commander to resemble a like new status. Our eManual contains all the information you need to make repairs, service the engine, and maintenance. The history of the Jeep Commander is interesting and fast paced. The first Commander produced was in 2005. Most years offered the same models with a few changes. The big change came in 2006 when it came with available folding third row seats. This change helped Jeep compete with other big name car manufacturers producing family sized SUV's. From 2006 to 2010, the Jeep Commander was made in trim levels including the Base, or Sport. This trim came with two different engine options, the 3.7L V6 engine or the 4.7L V8 engine. This mid-size SUV has some serious power. It also included available seating for 7 passengers. The Limited model was produced from 2006 to 2010 and came with either a 4.7L or 5.7L V8 HEMI engine. The Limited came with leather power seats, standard 7 passenger seating, and a Boston Acoustics sound system. The Overland was produced from 2007 to 2009. It came with the 5.7L V8 engine. It had a custom mesh grille insert, Overland logos, and wood and leather interior design. It also has a large sunroof. The 65th anniversary edition was only produced in 2006. It came in either a 3.7L or 4.7L engine. It included 65th anniversary exterior badging and front seat badging. The Rocky Mountain trim came with Rocky Mounting badging and several other upgraded features. Maintaining the classic Jeep Commander is made easier with our Jeep Commander Service Manual. Regular maintenance of this mid-size SUV will keep it running smoothly for many more years. The sporty design and powerful engine make the Commander a classic Jeep icon and it deserves to be preserved. We can help you make this a possibility with the ease of use in our service manual. Our Jeep Commander workshop manual contains in-depth information on maintenance, service, and repairs. For just 5 years the Jeep Commander was in production in the USA and Austria and marketed to those continents. It shared its platform with the Grand Cherokee but offered 3 rows of seating instead of 2, marketed as the 5/7 seater version of the Liberty. Jeep only added 2-inches of extra wheelbase to the Grand Cherokee so many felt that the additional row of seating in the Commander was too tight. As standard, the car came with many modern features as standard including an immobilizer, traction control and reverse sensors. Engine options ranged from a 3-liter turbodiesel (outside of the USA) through to the 5.7-liter Hemi V8 on the Limited and Overland trims. Chrysler also marketed this same car through its Dodge brand as the Nitro with a slightly different body, they continued to sell the car 2 years after this one. Jeep offered the Commander with 3 different levels of offroad capability (Quadra-Trac I, Quadra-Trac II, and Quadra-Drive II) with some containing limited-slip-differentials and metal plating to protect components under the car. To suit different budgets the mid-size SUV was offered in a variety of different trims such as: Base/Sport – the entry-level model with 5 or 7 seats Limited – this included either a 4.7 or 5.7-liter V8 engine Overland – included a 5.7-liter Hemi V8, GPS and Command View sunroof 65th Anniversary Edition – in 2006 this trim was available with front bucket seats and a premium sound system Rocky Mountain – includes a Boston Acoustics sound system and darkened alloy wheels Eventually, in the 2010 model year, the Jeep Commander was discontinued and Chrysler instead focused the Dodge Durango on this segment of the market. Sales of the car in the USA peaked in 2006 at 88,497 but quickly died off year by year with the last sales taking place in 2011. In China, the model name was used on a rebadged Cherokee called the "Grand Commander" from 2018 onwards which featured 7-seats. Common Problems With The Commander Rough idling – the spark plugs are prone to failure and could be the cause of this erratic idling issue Heating – if the heating seems to not work for certain settings setups then the root of this could be a faulty heater blower resistor that can be easily replaced Door handles – these are known as a common part to fail on the Jeep Commander and will need replacing with the housing its sat in Sunroof – the Commander's sunroof is known to leak and this is an easy one to sort by simply unblocking the guttering down the side of the sunroof to relieve rainwater We have 54 Jeep Commander manuals covering a total of 44 years of production.
